

A Playdate Platform for Parents to Explore Activities

- Making it simple for parents to find great playdate opportunities for their children.
- Making it easier for kids to socialize and for families to enjoy time together.

The Need for Family-Friendly Community

In today's fast-paced world, where work-life balance is often a challenge, parents are increasingly seeking ways to enrich their children's lives through social interaction and engaging activities.

Even though parents want their children to socialize, planning successful playdates can be harder than it seems.

To solve these problems, this project aims to create a platform called **MiniMates**, which simplifies the process of planning playdates.

Highlighted Features

Explore Activities

Parents can easily discover age-appropriate activities and events by filters in their area.

Customized Activities

Minimates allows parents to post their own preferred activities.

AI recommendations

Minimates can generate activities list based on the age, location and gender, integrating OpenAI to give parents playdate recommendations.

Towards a More Connected and Enriched Family Life

Minimates has the potential to create a stronger sense of community, foster meaningful connections, and enrich the lives of families. By advanced technology and building a supportive environment, it can empower parents and inspire a more connected and enjoyable family life.
